

JomWALL 4

Joomla! Social Networking Extension

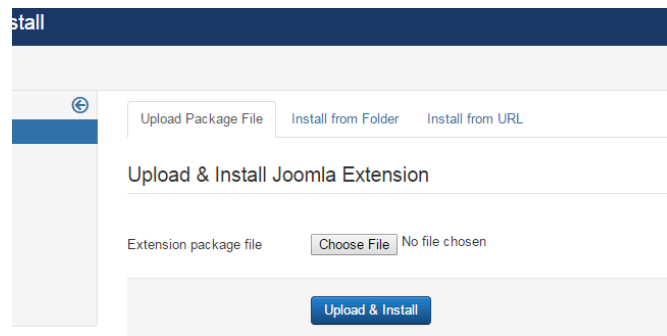

Ready to get started?

Download JomWALL 4 Zip packages from your account in the download section of our website at [Dashbite.com](https://dashbite.com)

*** Please make sure to unzip any files that said Extension.name_**Unzipme1st.zip** ***

1. JomWALL Installation

- 1- Go to your Joomla admin area > Extensions > Install/Uninstall.
- 2- In the Upload Package File section clicks Browse and locate the archive of the JomWALL Zip File something like "JomWALL_4.0_revXX".
- 3- Then click Upload File & Install the zip file then click the green button to complete the installation.
- 4- Done, you can now go to JomWALL 4 settings administration in joomla backend and adjust as need it.

2. Automatic menu assignment

JomWALL 4 create the necessary menus ready to be use, you can rename it or adjust menus at your wish.

*** You can now go to Joomla front end and click on the menu JomWALL that has been automatically create for you, and you will see JomWALL extension installed in your joomla as we said that menu can be renamed or relocated as your wish. ***

- Now you can start uploading the plugin and module that you are going to use... see a list of the plugins and modules and what they do below.

Ps. we are still updating this document ...

3. JomWALL Plugins

After unzipping this JomWALL plugin package, you will find 6 plugins

(You must install 1 and 2 below as they are need it for JomWALL to work correctly)
